

## **Minutes of Meeting of Tangimoana Committee Held 17<sup>th</sup> February 2020**

**Present:** Margaret, Sue, Annie, Russell, Geoff

**In Attendance:** Alison

**Apologies:** Jenny G, Denise, Trudy, Janine

**Correspondence: inward** ANZ Bank Statement

**outward**

**Matters Arising:** Informal Meeting not enough present to elect offices. Council to come to the next meeting in March.

**Community Plan:**(whats been completed,whats been planned,timeline,actions)

**Hall:** Nothing to report

**Council Matters:** Partnership between Council and Committee really important. District Plan for Tangimoana the rules have changed this is denoted by Regional Council Flood Plans this also includes other rural villages. But parts of Tangimoana village are below sea level and with sea level rises this will affect any new buildings permits etc going forward.

There is a 24hr call center at the Council for any roading issues.

Footpath budget is coming up again soon and this can be looked at for any incomplete footpaths or repairs such as Punga St which needs finishing.

Stormwater scheme surveying has been done and there is some drains that always have water in them such as Ripa St, Aru St and Punga St.

Household recycling bins were offered 5 years ago to residents of Tangimoana with a cost of \$120 per year a large percentage of the residents said they didn't want then. The Council could look at doing this exercise again next year.

## **General Business:**

Recycling Center has rubbish bags being dumped there instead being put out for collection. Green waste was mentioned about being shifted but at the moment there is no other suitable site.

Community Development fund is to be looked at applying for to help towards the Centenary celebrations in 2021 up to \$5000 can be applied for but certain criteria will need to be met.

Playground is still not finished with the bark chip and also the boat to have the ropes attached. **Alison to go back to the council about this.**

Access down beach road has deteriorated with lots of loose sand at the end going onto the beach and access in an emergency is limited. This is the same with the boat ramp with limited access in a boating sea emergency and the Boat Club has donated some money to get this completed. **What can the council do to help with both of these?**

Community noticeboards need the perspex front replaced with glass as the notices are hard to read. The council community fund could be used for this.

Yellow AA signs needed for the school and also the shop that has the local AED emergency unit stored there. **Council to look into this**

## **Subcommittee Reports**

Reserve group is going well with regular clean ups and the school was helping with this too.

**Meeting finished:8.30pm**

**Next meeting:Monday 16<sup>th</sup> of March**
